Whatever the sector – the graphic and chemical industries, aerospace, medical technology, precision engineering, optics or textile machinery – there is hardly an area where Högg products are not used. That's why our customer base is so diverse.

Key advantages of Högg profiles:

- Manufacture in an extremely wide range of materials, including steel, non-ferrous metals, plastics, titanium, alloys, etc.
- Compliance with tight dimensional tolerances
- Fast modification of profile sections and shapes
- No minimum order quantities
- Short delivery times

Even our ground profiles meet the following standards:

- Precision shape and position tolerances
- Ultra-fine surface finishes

Högg profile technology means:

- High-precision, ground and milled profiles in all materials, exactly matched to your requirements

Finished profiles:

- Full machining by Högg on state-of-the-art CNC machines

Interested in profiles with a host of advantages for the ultimate customer benefit?
